HISTORY

Ottoway Fabrication is a full-service engineering and steel fabrication business resulting from the merger of two long established and capable South Australian engineering companies with a combined history of successful service delivery exceeding 70 years. The two organizations were originally brought into the same Corporate Group in 2008 under the umbrella of publicly listed E&A Limited.

With substantial history in Engineering and Maintenance Services, Drafting, Procurement, Fabrication, Machining and Site Installation works, Ottoway Fabrications' principal Engineering, Drafting, Procurement, and Corporate Service functions are located in Wingfield SA while the Company's significant fabrication operations are primarily based in Whyalla SA. Sales and technical services are also offered from an established office in Roxby Downs SA while a similar operation in Mt Isa QLD incorporates a fabrication facility predominantly servicing the local region.

Ottoway Fabrication's services are used by many major organizations to reduce plant-operating costs and increase plant availability. This is achieved through application of our expertise in Engineering, Design, Materials selection, Manufacturing Management, Procurement and Supply systems.

The Company also has a strong track record supplying components and complete solutions for major projects. This has included large tanks, conveyors, hoppers, pressure vessels, piping, ducting, structural steel and fabricated sections for mining, processing and infrastructure clients.

Our current work force includes in excess of 100 workshop personnel including specialist welders, boilermakers, sheet metal workers, mechanical fitters, riggers, trades assistants, apprentices and stores.

With approximately 140 skilled personnel, the combination of practical experience and technical expertise applied across the full range of Engineering and Manufacturing functions and a focus on delivering value to all key stakeholders is the cornerstone of our operations.

The combined corporate ownership structure also guarantees access to resources, processes and facilities.

MISSION

OUR MISSION IS:

- To be Australasia's leading service provider of integrated manufacturing services to key industries including heavy engineering, mining, defense, water, energy and renewable resources sectors;
- To use our expertise as a prime contractor to deliver value to our customers in design, engineering, manufacturing, project management, procurement and on-site services;
- To create stakeholder value through our skilled and dedicated workforce and shared commitment to safety, quality and the environment.

❖ OUR SHARED VALUES ARE:

✓ **Our Customers are our Business**

- Listen to and understand their requirements;
- We satisfy our customers through proactive, timely and cost effective job delivery;
- Delivery of continuous quality improvement and innovation with all of our services;
- Help our customers succeed now and in the long-term through our own performance.

✓ **We achieve through people and teamwork**

- The work we perform is safe, productive and valued;
- We continue to invest in developing our workforce skills;
- We are open, honest and respectful of each other;
- We listen to our people and help them achieve their life goals;
- We communicate and celebrate our achievements.

✓ **Success is our driver**

- Create a winning attitude;
- Set challenging goals and deliver on commitments;
- Seek new ideas and manage risks proactively;
- Deliver on budget, on time and fit for purpose;
- Be innovative and resourceful.

✓ **We are committed to Zero Harm to people, customers, suppliers, communities, facilities and the environment.**

- All incidents are promptly reported without exception;
- We communicate our obligations;
- We continuously improve our safety performance;
- Always act with integrity and respect for the communities in which we operate;
- Incident prevention is demanded, expected and managed by all of us;
- Zero Harm is everyone's responsibility.

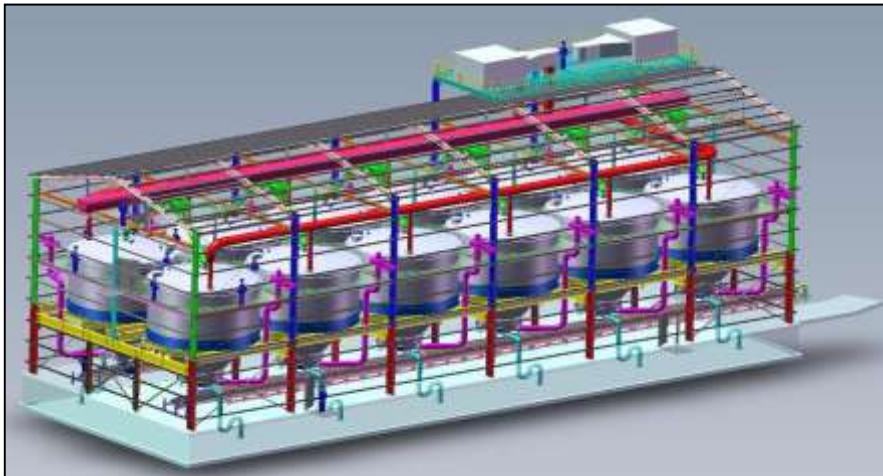

SERVICES

Ottoway Fabrication offers the following Core Services:

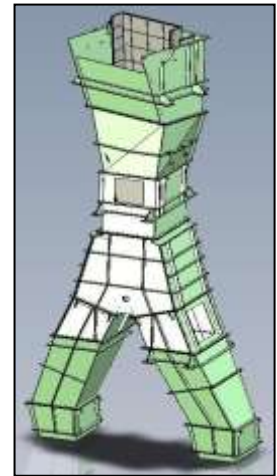

❖ ENGINEERING

- Experienced Mechanical Plant & Design Engineers
- Concept-to-Detail design including site assessment and verification
- 3-D Modelling and Detail Drafting
- Re-engineering to improve performance
- Reverse Engineering of obsolete plant
- Integrated access to Specialist Mechanical, Structural, Civil, Electrical and Process Engineering services & significant supplementary drafting capacity tailored Engineering Document Management Systems & Services

Process Plant Modelling

Splitter Chute

Engineering and Services Centre – Wingfield SA.

SERVICES

❖ FABRICATION & MACHINING

- Light, Medium and Heavy Structural and Plate Fabrication
- Pipe work, Tanks and Vessels
- Carbon and Stainless steels, Aluminum, Titanium and Copper-Nickel
- Medium and Heavy Machining services
- Abrasive Blasting and Spray Painting
- 6 hectare manufacturing complex adjacent to Road, Rail & Port Facilities
- 10,000m² fully serviced Workshops and 3,000m² open hard-stand area
- 100T OET Workshop Crane

E&A Building – Whyalla S.A.

Stockbridge Boom

❖ SITE WORK

- Provision of Shut-down Management and Trade Labor
- Maintenance Services
- Site erection of Steel Structures, Pipe Work and Tanks etc
- Installation & Commissioning of Equipment and Integrated Plants
- Remote site capability

❖ **PLANT REFURBISHMENT & ROTABLES MANAGEMENT**

- Management of all aspects of equipment repairs and overhaul
- Site assessment of equipment & operating environment
- Agreed fee to strip, inspect, report on condition and quote for overhaul
- ITP and MDR documentation as appropriate
- Heavy Duty Pumps and Gearboxes
- Mineral Processing, Refining and Smelting plant equipment

❖ **PROJECT MANAGEMENT**

- Project Managers experienced in design, manufacturing and site works
- Established HSEC Policies & Procedures
- Microsoft Project software used
- Established data security by remote access to Ottoway Fabrication servers
- Ongoing project review and reporting to client
- Variation management protocols
- All project works extensively backed by in-house Engineering, Manufacturing and Labor resources

❖ **PROCUREMENT MANAGEMENT**

- Advanced Procurement Systems delivering Quality Engineered items (unique & in volume) manufactured locally and overseas
- Highly competitive sourcing backed by the combined buying power of multiple client organizations
- Demonstrable annual savings on the cost of sourcing engineered mechanical spares of 10% to 20% on average for clients who take advantage of Ottoway Fabrication 's full scope procurement services

CORPORATE CULTURE

Ottoway Fabrication highly values the trust and opportunity offered by Clients when electing to utilize our various services.

In return, our Clients can expect the following from us:

- Zero Harm
- Demonstration of performance in keeping with our stated shared values
- Honesty, Integrity and Respect in all business dealings
- Ownership and accountability
- Clarity of communications with ‘No Surprises’
- Capability to integrate in-house and specialist external resources to manage your works regardless of complexity or scale
- Significant fabrication capability and support
- Experienced shutdown management supervision and trade labor
- Flexibility to tailor services to meet client needs
- Significant cost savings and plant performance improvement through:
 - Re-engineering
 - Advanced engineering procurement processes
 - Advanced management and overhaul of Rotable spares
- Quality assured products and services
- Determination to meet your needs in such manner as you would welcome the opportunity to utilize our services again

MAJOR CLIENTS

QUALITY ACCREDITATION

Ottoway Fabrication is certified to AS/NZS ISO9001:2000 by SAI Global.

Quality accreditation is a means of providing consistency and traceability. The Ottoway Fabrication quality system minimizes the risk of you receiving inferior products or services.

Our quality management of each project begins from the time that an Ottoway Fabrication team member receives an enquiry from you. Ensuring that information obtained from the customer is accurate and achievable is paramount to ultimately providing "fit for purpose" deliverables.

Ottoway Fabrication's unique operation provides an additional independent quality inspection facility. Each stage of the job is thoroughly inspected.

Our inspectors function and report independently to manufacturing operations to assist in verifying products are of the highest quality in accordance with specifications at all relevant stages of production.
